Management

EmbraceID

Biometric Access Platform for Existing Physical Access Control Systems

Easy Integration with a
Variety Access Control
Systems (ACS)

On-Site Identity Data Base
for Multi-Site Organizations
& Remote Staff

Permissions Assigned & Authorized via
Integrated ACS to Any Sensitive or Locked
Areas with Iris/Facial Recognition

100% Accuracy of Event Logs of Entry/Exit

Innovative Self-Enrollment Solution

- FULLY AUTOMATED PROCESS -

Pre-Registration

Using a mobile device and the **CreatelD** portal, users take a picture of their face and photo ID (Driver's License, Passport, etc.) and submit information.

Administrator Review/Approval

Submissions are reviewed/approved by an administrator.

Credentials Added to System

Approved users are added to the on-site database/directory & cleared for access as defined by the administrator.

Access Granted!

Users gain access by presenting face/irises in front of on-site device.

Visitor Management

Visitors can contact their host using the on-device directory. Hosts receive an email/text with picture of visitor and then allows them to remotely unlock entry points, if desired.

Solution Summary

Locked Out Tenants

No fobs or Keys to Manage

Manage Tenant Turnover

Controlled Access for Employees Vendors/Visitors

Proven

01

A single access control platform deployed in **over 90 million Samsung products** & large enterprises in banking, oil & gas, and higher education

02

Innovative

A **flexible biometric hub** with support for multiple modalities (Iris, Face, Fingerprint, Palm Vein, & others) and capture devices

Flexible

03

A **highly scalable, multi-factor platform** that allows for tight integration with new & old access systems, along with various applications

04

Secure

Accurate identification is ensured at the highest-level using biometrics & touchless systems that eliminate human intervention & physical contact
